

Student Self Isolation Learning Checklist

Dear Student

You may find yourself in the position that you need to self-isolate this academic year because:

1. You have symptoms of or tested positive for Covid-19 and have to spend some time off school
2. A family member has symptoms of or has tested positive for Covid-19

If this is the case you please follow the below checklist:

- Check Microsoft Teams for each of your classes that day. This is where your teacher will post resources for their lesson.
- Check the website for the learning plan for each subject and look at the topic you were due to learn about each day.
- Check the files section for resources your teacher has posted in relation to your most recent learning.
- If it is your whole class off, a recorded lesson or live streamed lesson will be offered by your teacher, please engage with these resources on Teams.
- If it is just you that is self-isolating in your class your teacher will not be able to do this as they are still in school teaching the rest of your class and the rest of their normal timetable. **Please do not email your teacher directly.** They will provide relevant resources in the "Files" section of Teams
- It is not always possible to post resources electronically so you could at the very least use the attached independent study sheet to investigate and learn about the lesson you have missed using the learning plan from the school website.
- Please then only email your teacher directly if you have exhausted the above instructions.
